TECNOLOGIES: ▼

DRILL TUFT 3D®

Technology that combines the 3D CAD design with the construction of the support and the insertion of the filaments in the same order of production, achieving the manufacture of technical brushes with maximum precision and efficiency.

RESIN® FORMULA

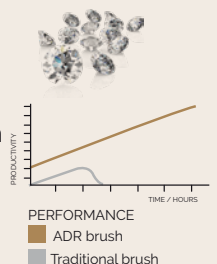

All brushes can be **resin coated**. This allows to apply greater pressure on the tools in the process, achieving a **greater texture**. Recommended option when treating very hard stones.

ADR®

A controlled and homogeneous dispersion of the diamond, make this technology the perfect combination to achieve superior **Diamond Resin Abrasives**.

Increase in the productivity with respect to the traditional brush, avoiding the continuous machine stops.

Individual identification by marking with a numerical button, informing of the corresponding grain.

Ecological. This product does not contain substances prohibited according to the regulation (CE) n°1907 / 2006
