ESSENTIAL

Enhanced Connectivity & Precision... Anywhere

The 5x LPI is designed to revolutionize your templating workflow with the power of wireless connectivity and pinpoint accuracy, no matter where the job takes you. Engineered for speed, dependability, and ease of use, the 5 x LPI empowers you to complete projects faster and with greater precision—delivering consistent, reliable results every time. With unmatched efficiency and simplicity, you can tackle any job with absolute confidence and elevate your workflow to the next level.

LPI
LASER PRODUCTS | EUROPE

Simplified Level Plane Setup

Simplify your workflow with one-point plane setup for horizontal applications making setup faster and hassle-free.

Enhanced Precision on Multiple Surfaces

Achieve pinpoint accuracy on an even wider range of surfaces. Enhanced reflection management ensures reliable measurements without interference, giving you consistent, professional results every time.

Capture Splines*

With 5 x LPI, capture complex curves and surfaces, as well as edit those points, to achieve higher-quality and smoother digital templates from pools and tub decks to sinks and anything with compound curves.

Wireless Connectivity

Experience the freedom of wireless connectivity with the 5 x LPI, enabling faster and more seamless communication between the tablet and laser unit. This untethered setup lets you capture and transfer data effortlessly, enhancing mobility and efficiency on every job.

Faster Measurement Capture

Boost your productivity with the 5 x LPI's advanced capture technology, designed to record measurements faster than ever. Paired with the quicker mounting, one-point plane setup, and digital indexing, this streamlined process allows you to complete jobs more efficiently, saving time onsite and increasing your capacity to take on more projects.

Magnetic Tablet Mount

Enjoy ultimate stability with our magnetic mount, keeping your tablet securely positioned on the tripod throughout the job. When it's time to move, simply detach and go—paired with wireless connectivity, you get complete mobility and freedom to capture and transfer data seamlessly wherever you need it.

LED Status Button

Stay in control at a glance with the LED status button, featuring bold color indications for real-time status updates. From setup to completion, you'll know exactly what your unit is doing, giving you confidence in every measurement.

Quick-Mount/Release

Speed up every project with our intuitive quick-mount and release system. This feature ensures that your laser unit is securely mounted in seconds, boosting efficiency without sacrificing stability or accuracy.

**Start with the essentials.
Grow with confidence.**

Introducing LT3Raptor Essential, the streamlined version of our revolutionary LT3Raptor software. Designed to pair seamlessly with the new 5 x LPI laser templating system, LT3Raptor Essential delivers the core tools you need for accurate and efficient digital templating.

As the base software for 5 x LPI, LT3Raptor Essential is tailored to companies that are just starting their journey into digital templating and looking for reliable performance without advanced features or integrations. While LT3Raptor Essential gives you the basics to thrive, it does not include advanced functions of the software or benefits of LPI Cloud or StoneTag label system. When you're ready to scale up, upgrading and subscribing to the full LT3Raptor platform is just a few clicks away!

* Feature only available with a subscription to the full LT3Raptor platform.
