Properties:	AKEMI® Mild Stone Soap is a special product made of natural agents, non-ionic surfactants, auxiliary materials and odoriferous substances and is free from phosphates, bases, waxes and polymers; The surfactants contained are easily biodegradable according to current OECD legislation (certified by an external German testing institute).
Application Area:	AKEMI® Mild Stone Soap is suited for the daily care of smooth and rough, absorbent and non-absorbent, untreated, impregnated or sealed natural and artificial stone floors, s.a. marble, granite, slate, terrazzo, brick, clinker and cotto slabs as well as cement tiles. As the product does not contain any waxes, polymers or gloss agents, it does not result in a film or residue on the surface of the stone. The stone retains its natural vapour permeability. If used regularly, the effectiveness of AKEMI® impregnations and sealers will be enhanced. If used regularly, the structure and colour of the stone will be shown at their best advantage. AKEMI® Mild Stone Soap is also suited for surfaces which were treated with AKEMI® Stone Polish (wax or silicone based) and Polishing Fluid No. 10-2012. AKEMI® Stone Cleaner is recommendable for more intensive cleaning purposes.
Instructions for Use:	<ol style="list-style-type: none">1. Add 2-4 tablespoons (20-40 ml) of AKEMI® Mild Stone Soap in 10 liters of water.2. Wipe the floor. No additional cleaning necessary.
Special Notes:	<ul style="list-style-type: none">- For proper waste disposal, the container must be completely emptied.- Recycling in accordance with the guidelines of EU Decision 97/129 EC on the Packaging Directive 94/62/EC.
Technical Data:	Colour: golden yellow Density: approx. 1.03 g/cm ³ pH value: approx. 10 (if concentrated)
Storage:	If stored in dry and cool condition (5-25°C/41-77°F) in its closed original container at least 24 months from production.
Health & Safety:	Read Safety Data Sheet before handling or using this product.
Important Notice:	The above information is based on the latest stage of development and application technology. Due to a multiplicity of different influencing factors, this information – as well as other oral or written technical advises – must be considered as non-binding hints. The user is obliged in each particular case to conduct performance tests, including but not limited to trails of the product, in an inconspicuous area or fabrication of a sample piece.
